## DataNumen Outlook Drive Recovery Crack+ With Keygen Download For Windows

DataNumen Outlook Drive Recovery is the tool to get back data you had lost from Windows PST files. DataNumen Outlook Drive Recovery is an easy and affordable utility to recover from damaged PST files. DataNumen Outlook Drive Recovery is a simple and practical software solution created to help you regain access to lost or accidentally deleted PST files from your computer or other storage devices. Standardized yet intuitive GUI Appearance-wise, the application corresponds to the pattern set by other programs from the same developer, its looks varying only slightly to accommodate its particular functionality. The main window is split into three main tabs, specifically 'Recovery', 'Batch Recovery' and 'Options', letting you configure the process to suit your requirements. Restore PST files individually or in batch To get started, DataNumen Outlook Drive Recovery allows you to define the disk that you wish to scan for deleted PST files; it can be a local or an external storage device, as the tool supports working with flash drives, floppy disks and other such items, in various file system types (FAT, FAT32, Linux Ext, and more). Next, you can define the output destination and name of the restored file, preferably on a different disk than the source one. You can thus click on 'Start Recovery' and the utility will begin analyzing your system, attempting to retrieve the deleted files; however, bear in mind that the operation may take a while to complete. The 'Batch Recovery' function enables you to process multiple source disks simultaneously, helping you save the time it would otherwise take you to handle them one by one. For customizing the tasks, the tool lets you configure its running parameters from the 'Options' and 'Advanced Options' sections. A useful PST restoring instrument In conclusion, DataNumen Outlook Drive Recovery is an effective and intuitive application that can help you retrieve important data stored in erased or misplaced PST files (messages, contacts, calendar entries, and others), in just a few swift mouse clicks.
